3 MILES OF WASTEWATER TREATMENT WALL CAN CLEAN THE MOST POLLUTED RIVER IN THE U.S.

ILLEGAL TOXINS

The border wall would be located between the United States and Mexico, and would include fences, barriers, and other physical structures to prevent illegal activity such as drug trafficking, human smuggling, and other criminal activities. The wall would be designed to be both secure and durable, with features such as barriers, lighting, and surveillance equipment to ensure the safety and security of the area.

WASTEWATER TREATMENT

Water collection on the wall can assist in preventing death by hypothermia, hyperthermia, and dehydration.

PREVENTING FLOODING / INCREASING SECURITY

The border wall has already proven to be effective at preventing illegal activity and securing the border. By building a wall, we can prevent the flow of illegal immigrants, reducing the risk of crime and terrorism in the United States.

LIBRARIES, CLASSROOMS AND CLINICS CAN PLUG INTO SOLAR ENERGY, HOT WATER AND METHANE ON THE WALL

Social infrastructure

The border wall can serve as a social infrastructure that offers services to the communities on both sides. It can include libraries, classrooms, clinics, and other facilities that can provide education, health care, and other services to the people living near the border.

A BORDER WALL PARK CAN CREATE PEDESTRIAN AND BICYCLE ROUTES THROUGH CITIES

The border wall can also be designed as a green space park that connects the two sides of the border. It can include walking and bicycle paths, playgrounds, gardens, and other amenities that can be enjoyed by people on both sides.

By building the border wall, we can create a safer and more secure environment for the United States and Mexico. It will help to prevent illegal activity while providing a safe and secure border for all citizens.
