LOCAL CODE : REAL ESTATES

Proposed Location: Major U turn and off-street parking lot off Junipero Serra Blvd.

Using parametric methods, a design proposal for each site's characteristics and local conditions, optimizing thermal and electrical performance on-site to enhance the overall city's ecology and reducing carbon emissions and water usage.

The project assumes a 25 year land banking effort.

Environmental Design Performance & Community Design Simulation

Heat
Golden Gate Park, SF
Proposal Location

Savings: $2.46 Billion/yr

What amenities do you want?

Planning Board

Local Code: Interface

LANDSCAPE
INSOLATION
WIND SPEED

Monitoring and evaluating the performance of each site and area of each city in need of remediation and community investment, prioritizing the opportunity to build social, as well as ecological infrastructure.

Evapotranspiration & Constructed Wetland
